Smartbar - a lighter, stronger, safer, greener and smarter alternative to impact resistant bull and nudge bars.

In research at Adelaide University, Smartbar out-performed steel and aluminium bars in all comparison tests. Smartbar absorbs impact and minimises the risks of engine damage and injury to occupants in event of an animal strike or vehicle accident.

Smartbar is known in Australia for it's outstanding impact resistance and protection in animal strikes. This is the very reason Smartbar is the product of choice for ambulance and police services across Australia.

SMART BAR

THE SMART CHOICE IN VEHICLE SAFETY

With superior deformation deceleration properties, Smartbar springs back to its original shape, minimising damages, saving lives and money. Smartbar is made from environmentally friendly recyclable polyethylene that is UV stabilised for durability

NOW AVAILABLE IN SOUTH AFRICA
